

Stratasys ABS*plus* is up to 40 percent stronger than standard Stratasys ABS material and is an ideal material for conceptual modeling, functional prototyping, manufacturing tools, and end-use-parts. The marriage of ABS*plus* with Fortus® 3D Production Systems gives you the ability to create Real Parts™ direct from digital files that are stronger, smoother, and with high feature detail.

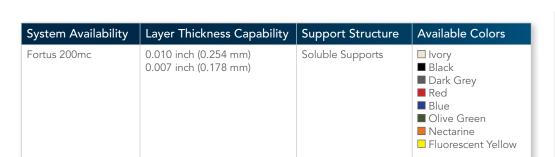

Mechanical Properties ¹	Test Method	English	Metric
Tensile Strength (Type 1, 0.125", 0.2"/min)	ASTM D638	5,200 psi	36 MPa
Tensile Modulus (Type 1, 0.125", 0.2"/min)	ASTM D638	329,500 psi	2,300 MPa
Tensile Elongation (Type 1, 0.125", 0.2"/min)	ASTM D638	4%	4%
Flexural Strength (Method 1, 0.05"/min)	ASTM D790	7,604 psi	52 MPa
Flexural Modulus (Method 1, 0.05"/min)	ASTM D790	319,737 psi	2,200 MPa
IZOD Impact, notched (Method A, 23°C)	ASTM D256	1.8 ft-lb/in	96 J/m

Thermal Properties ²	Test Method	English	Metric
Heat Deflection (HDT) @ 66 psi	ASTM D648	204°F	96°C
Heat Deflection (HDT) @ 264 psi	ASTM D648	180°F	82°C
Coefficient of Thermal Expansion	ASTM D696	4.90 E -05 in/in/°F	
Melt Point		Not Applicable ³	Not Applicable ³

Electrical Properties ⁴	Test Method	Value Range
Volume Resistivity	ASTM D257	4.0 x 10e14 - 5.0 x 10e13 ohms
Dielectric Constant	ASTM D150-98	2.9 - 2.7
Dissipation Factor	ASTM D150-98	.00520049
Dielectric Strength	ASTM D149-09, Method A	370 - 71 V/mil

Other ²	Test Method	Value
Specific Gravity	ASTM D792	1.04

The information presented are typical values intended for reference and comparison purposes only. They should not be used for design specifications or quality control purposes. End-use material performance can be impacted (+/-) by, but not limited to, part design, end-use conditions, test conditions, color, etc. Actual values will vary with build conditions. Tested parts were built on Fortus 200mc @ 0.010" (0.254 mm) slice. Product specifications are subject to change without notice.

 4 All Electrical Property values were generated from the average of test plaques built with default part density (solid). Test plaques were $4.0 \times 4.0 \times 0.1$ inches ($102 \times 102 \times 2.5$ mm) and were built both in the flat and vertical orientation. The range of values is mostly the result of the difference in properties of test plaques built in the flat vs. vertical orientation.

At the core: Advanced FDM Technology™

Fortus systems are based on patented Stratasys FDM (Fused Deposition Modeling) technology. FDM is the industry's leading additive manufacturing technology, and the only one that uses production grade thermoplastics, enabling the most durable parts.

Fortus systems use a wide range of thermoplastics with advanced mechanical properties so your parts can endure high heat, caustic chemicals, sterilization, and high impact applications.

No special facilities needed

You can install a Fortus 3D Production System just about anywhere. No special venting is required because Fortus systems don't produce noxious fumes, chemicals, or waste.

No special skills needed

Fortus 3D Production Systems are easy to operate and maintain compared to other additive fabrication systems because there are no messy powders or resins to handle and contain. They're so simple, an operator can be trained to operate a Fortus system in less than 30 minutes.

Get your benchmark on the future of manufacturing

Fine details. Smooth surface finishes. Accuracy. Strength. The best way to see the advantages of a Fortus 3D Production System is to have your own part built on a Fortus system. Get your free part at: www.fortus.com/benchmark.
